BMT1	PACK 100	Clear	560mm X 890mm	440	1	125

Product Description:

Proguard Rubble Sacks are made from tough, tear resistant polythene to suit the requirements of the construction industry. Strong and durable, these heavy duty rubble sacks are suitable for storing or disposing of sand, gravel, rubble and general building waste.

Proguard rubble bags are reusable and recyclable and available in a range of grades, sizes and colours. Clear rubble sacks are excellent when the contents need to be checked before disposal. Our product code BM5R comes rolled in 10's which is ideal when selling in builder's merchants.

Rubble bags are also known as builders bags, polythene sacks and aggregate bags.

Benefits:

- Hard wearing – can be reused and recycled.
- Available in a range of grades, sizes and colours.
- 100% waterproof.
- Heavy duty rubble sacks.
- Can be printed with your company logo (minimum quantities apply).

Limitations:

- When bagging sharp materials such as glass we recommended using our *Proguard Woven Rubble Sacks* which are highly tear resistant.

Application:

Proguard rubble bags come loose in boxes of 100 or rolled in 10's (10 rolls of 10 per box). Simply open the rubble sack and fill with the site waste. Cable ties can be used to seal the bags.
